WHAT DID THE AMERICANS LEARN FROM AGRICULTURE IN THE EURASIAN STEPPES?

In the late 19th and first half of the 20th centuries there were large scale transfers of technology from the United States to the Russian Empire and Soviet Union. Professor Moon will talk about some of the less well known transfers that went the other way. After the Americans began to cultivate the Great Plains in the late 19th century, they drew on experience in the Eurasian steppes.
